- ▶ Custom Master Page and Page Layout Design (SharePoint 2013)
- ▶ SharePoint JavaScript Object Model & REST API
- ▶ Next.js and Remix
- ▶ Ionic Framework, Capacitor
- ▶ Firebase Platform, MongoDB

Experience

DEVELOPMENT TEAM LEAD @ WHITE & CASE – JAN 2019 - PRESENT

- ▶ Managed day to day operations for our SharePoint intranet team currently serving ~7k users around the globe. Including project planning, resource allocation, training, and mentoring.
- ▶ Standardized development for the team by creating a style guide, setting up regular code reviews, and developed a CI pipeline that automated testing and deployments.
- ▶ Lead project to upgrade a very complex Angular JS application into much smaller stand-alone React and Angular components.
- ▶ Created regular training and knowledge sharing sessions to ensure that developers continue to learn and stay up to date on their skills

SENIOR SHAREPOINT DEVELOPER @ WHITE & CASE – JUNE 2016 - PRESENT

- ▶ Built a legal matter tracking application that allowed lawyers to consolidate all information about a client into a single portal. This was built with Angular on top of SharePoint using the REST API.
- ▶ Created a Facebook-like social interface for the intranet. This includes feeds on every site with posts that could be shared between sites (security trimmed). It also included comments, likes, and shares for posts. This was also built with Angular.
- ▶ Created a Personal Profile page for the intranet that pulled in info from a 3rd party HR system called PeopleSoft. This included a follow interface that allowed you to follow a user's interactions on the intranet.
- ▶ Created a drag and drop permissions manager for SharePoint 2013. This allowed users to manage their sites permissions without accessing site settings or any admin SharePoint screens.
- ▶ Created location driven policy and HR sites that allowed users to see only their relevant information.

- Created a shared internal library of services so that other developers could share common functions and calls to get common data.

SHAREPOINT DEVELOPER @ ARMA GLOBAL – MAY 2015 - JUNE 2016

- Developed custom MasterPage and Page Layouts per Chief of Staff requirements (SharePoint 2103)
- Utilized JSOM and jQuery to develop a Map Part that uses a SharePoint List to feed events for each country on map.
- Created Facebook style color-coded Notification part for Master Page.
- Created SharePoint Search based dashboard solutions to provide metrics for military leadership.
- Designed complex custom SharePoint Designer workflows based on Customer Requirements.
- Designed InfoPath forms to support customer business workflows for numerous clients within organization.
- Provided detailed documentation with all solutions to present to client and provided end-user training.

SHAREPOINT CONSULTANT @ ALLEGIENT LLC – NOV 2013 - APR 2015

- Worked on projects for: Eli Lilly, Roche, NCAA, IU Health, Knauf Insulation and Harrison College.
- Custom InfoPath Forms and SharePoint Designer workflows using 2013 products.
- Developed custom dashboards using CSWP in SharePoint 2013.
- Utilized InfoPath 2010 to develop intricate forms that consolidate and simplify business processes.
- Redesigned internal HR forms for the client and used complex workflows to integrate their ticketing system.
- Created custom workflows that automated previously manual tasks, making client more efficient.
- Worked directly with client, administering meetings to gather requirements and evaluate business needs.

SHAREPOINT SENIOR SYSTEMS ENGINEER @ MANTECH – NOV 2012 - OCT 2013

- Administered USFOR-A SharePoint portals on NIPR, SIPR, and CENTRIX enclaves. Portal administration duties include monitoring permissions on all sites, creating site collections, sites, libraries, and solutions on customer demand. Also maintained the SharePoint farms.
- Developed complex InfoPath forms that integrated workflows.
- Accomplished rewrite for the USFOR-A Content Manager 2 day training course. Conduct monthly training to instruct content managers on SharePoint best practices as well as policy and guidance for the USFOR-A environment.
- Installed and configured VMWare ESXi 4.1 on host machines. Added the host machines to Datacenter clusters by implementing VMWare VCenter. Migrated servers between virtual hosts in order to create a disaster recovery site for SharePoint farm.

SENIOR CONSULTANT @ BOOZ ALLEN HAMILTON – APR 2011 - OCT 2012

- ▶ Upgraded all Cisco Appliances and assisted with mapping the Department of Finance and Accounting Service's (DFAS) network.
- ▶ Performed initial proof of concept with SharePoint 2010 to show government value in switching from current platform.
- ▶ Developed automated dashboard that pulled from ticketing system to deliver real-time metrics to leadership about ongoing projects.
- ▶ Interfaced between customer and engineers to route work to the correct teams to ensure work was completed in timely manner.

STAFF SERGEANT @ US AIR FORCE AND US AIR FORCE RESERVES – JUL 2003 - SEP 2012

Education and Certifications

Community College of the Air Force

University of Phoenix

MOS: SharePoint 2010 Certification

Security+ Certification
